

Product Sheet

SMARTRINK

Panels

Overview

All IcePro skating surfaces can be used for hockey, recreation or figure skating purposes. Although all the products are versatile there are applications to which they are better suited. If you are uncertain about which product to use please contact your nearest IcePro representative. SmartRink uses the best grade of High Density PE which is then sinter pressed and machined to exacting factory standards. SmartRink panels can be joined with ProFast panels within the same rink. SmartRink panels are an excellent product for the budget minded skating enthusiast and are designed to be used everyday and last many years.

Specifications:

Dimensions:	1020mm x 1020mm x 8mm
